PROJECT EXPERIENCE

GoIT

2024 – 2026

https://goit.global

Project Description: Educational platform with high-load traffic.

Tech Stack: WordPress, Laravel, HTML, SASS, JS

Role: Team Lead & Full-Stack Developer

- Led the development team, overseeing end-to-end feature delivery, sprint planning, and release management under Agile/Scrum methodologies.
- Architected and maintained full-stack code using PHP, JS, HTML, and SASS for interactive, responsive user interfaces and backend infrastructure.
- Managed performance optimization, SEO enhancements, and integrations with third-party platforms and services.
- Ensured robust code quality and maintainability through regular code reviews, technical mentorship, and streamlined team workflows.

Central Nic Reseller

2023 – 2024

https://centralnicreseller.com

Project Description: Hosting service platform.

Tech Stack: WordPress, Laravel, HTML, SASS, JS, Vue

Role: Full-Stack Developer

- Developed full-stack features using PHP, JS, HTML, and SASS for responsive UI and backend business logic.
- Handled performance tuning, SEO optimization, and integration of third-party APIs.
- Collaborated with developers, team lead, and scrum master to ensure timely milestone achievements in Agile sprints.

Binary Future

2023 – 2024

https://binaryfuture.io/ • https://annsandra.com

Project Description: Online gift registry and e-commerce platform.

Tech Stack: Laravel, Shopify, HTML, SASS, JS

Role: Full-Stack Developer

- Implemented full-stack architecture using PHP, JS, HTML, and SASS for key client-facing features.
- Optimized page performance, SEO metrics, and seamless third-party e-commerce service integrations.

Squla

2022 – 2024

https://www.squla.nl/

Project Description: Multi-country educational platform handling high traffic volumes.

Tech Stack: WordPress, WooCommerce, HTML, SASS, JS, React

Role: Full-Stack Developer

- Built custom WooCommerce solutions and developed reusable React components for Gutenberg editor.
- Optimized site speed and search engine visibility across international platform variants.

Webmeridian

2021 – 2022

https://webmeridian.net/

Project Description: SEO-driven corporate portal for a full-service Magento agency.

Tech Stack: WordPress, HTML, SASS, JS

Role: Full-Stack Developer

- Engineered responsive user interfaces and robust WordPress backend components.
- Executed complete performance and SEO optimizations, alongside plugin and third-party integrations.

Vegan Friendly

2020 – 2021

https://www.vegan-friendly.co.il/

Project Description: Global e-commerce platform for charitable donations in Israel (multilingual, RTL support).

Tech Stack: WordPress, Elementor, HTML, SASS, JS

Role: Full-Stack Developer

- Developed features supporting scheduled donations, RTL layout support, and interactive interfaces.
- Integrated REST APIs for donator receipts and dynamic AJAX workflows.
